Art Unit: 3657

## **DETAILED ACTION**

1. Claims 10-12, 15, and 17 are objected to because of the following informalities:

Claim 10, lines 7-8 "roller bearing the friction brake lining is movably" should be -- roller bearing and the friction brake lining are movably--,

Claim 11, line 1 "roller support mean" should be --roller support means--,

Claim 12, line 1 "roller support mean" should be --roller support means--,

Claim 15, line 1 "the axes of rotation" should be --axes of rotation--,

Claim 15, line 3 "the axis of rotation" should be –an axis of rotation--,

Claim 17, line 2 "the displacement direction" should be --a displacement direction--,

Appropriate correction is required.

## **Drawings**

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: numeral "40" in Fig. 2. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the

Application/Control Number: 10/584,186

Art Unit: 3657

filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Page 3

3. The drawings are objected to because numeral "16" in Fig. 7 should be brake lining "14". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 recites the limitation "they brace the friction brake" in line 2. It is indefinite and unclear as to what the word "they" represent.

## Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 10-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Dietrich et al. (US 6,318,513).

Dietrich et al. disclosed, as shown in fig. 1, a self-boosting electromechanical friction brake comprising: a friction brake lining 16 which is movable in a direction of rotation and into contact with a brake body 12, an electromechanical actuation device 32,34,36 with which the brake lining can be pressed for braking against the brake body, a ramp mechanism 18 which braces the brake lining at a ramp angle to the brake body,

the ramp mechanism having roller bearing that has roller bodies 30, with which roller bearing and brake lining are movably supported at a wedge angle to the brake body, and roller support means supporting the roller bodies fixedly and rotatably on a component of the friction brake.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hartsock (US 6,752,247)

Hartsock (US 6,938,737)

Baumann et al. (US 6,957,723)

Severinsson (US 7,258,206)

Nilsson et al. (US 7,347,304)

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to MARIANO SY whose telephone number is (571)272-7126. The examiner can normally be reached on Mon.-Fri. from 8:30 A.M. to 2:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi, can be reached on 571-272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for
